

Kohomadha

Market Entry & Business Development - Japan and Beyond

TOKYO, JAPAN | <https://tsunagu-web.vercel.app>

Who We Are

Kohomadha helps two kinds of clients move in opposite directions.

Into Japan Overseas companies that want to sell in the Japanese market.	Out of Japan Japanese companies that want to sell abroad.
--	--

We are not a research firm that hands over a report and steps back. We stay on the project - **finding the right counterparts, setting up the meetings, sitting in the negotiation room with you in both Japanese and English**, and supporting the contract and trade work through to the close.

TSUNAGU - Our Cross-Border Team

Kohomadha operates under the TSUNAGU banner: a small core in Tokyo working with a standing network of members across markets. *Tsunagu* is the Japanese verb "to connect" - it is what the practice is built to do.

Members and partners currently work with us from **Brazil, Africa, the Middle East, and across Europe**. They are not a subcontractor list we assemble per project. They are people we work with continuously, which is why we can put someone credible on the ground quickly, in the right language, without a hiring cycle.

For a client, the practical effect is this: you are not buying one consultant in Tokyo. You are buying a team that already spans the distance between your head office and your Japanese counterparty.

What We Do

01

Japan Market Entry

For overseas companies entering or expanding in the Japanese market.

- Market and competitor research
- Identification and shortlisting of target companies
- **Direct outreach and meeting arrangement**
- **Attendance at negotiations**, with Japanese and English support
- Distribution channel and reseller development
- Contract and trade / import-export practicalities

02

Overseas Expansion

The same support, in the opposite direction, for Japanese companies going abroad.

- Market research and local partner identification in the target country
- Meeting arrangement and negotiation support on the ground
- Export / import operations

03

AI & Business Automation

Offered alongside the above, or on its own.

- Business process mapping and automation design
- Workflow implementation (n8n and similar platforms)
- AI-assisted research and document production

Mandates & Appointments Roles that clients and public institutions have formally entrusted to us.

Exclusive Japan Mandate NORDIC WAVE ENERGY TECHNOLOGY

Under a Memorandum of Agreement with a **Swedish wave energy technology company**, we hold an **exclusive mandate for the Japanese market**, leading their market development here: partner introductions, relationship building, and access to climate and energy financing structures including MAF, GEOP and feed-in tariff routes.

The principal's name is withheld at their request.

Overseas Business Support Representative TOTTORI PREFECTURE

Appointed as an Overseas Business Support Representative for Tottori Prefecture. Our work is not limited to that region - see *Coverage*.

How We Work

1

Discovery

Understand your product, target customers and objectives

2

Market research

Competitors, price positioning and regulatory requirements in Japan

3

Targeting

Define and list the companies to approach

4

Outreach

Direct contact and meeting arrangement

5

Negotiation

We attend the meetings with you, with Japanese and English support

6

Closing

Contract terms and trade documentation

7

Ongoing support

Project management and, where useful, automation systems

Taiwan Market Entry - Forestry Machinery 2026

A Japanese company in the forestry machinery sector wanted to enter the Taiwanese market and needed to find buyers there.

- We researched the market and identified prospective customers in Taiwan
- We arranged and supported the business meetings

The engagement concluded in a signed deal. Completed in mid-2026.

SPAIN TO JAPAN

Plant-based food brand

Japan-side channel for a Spanish plant-based food brand, taking their products directly to department store buyers. Client name withheld.

BRAZIL

Logistics operator

Designed and delivered an operational automation tool.

JAPAN

Major reuse retail group

Implementing and rolling out digital transformation at one of Japan's largest reuse retail groups.

SRI LANKA

AVW Project

Produced and delivered the project's PR film and vision film. Our Representative Director's account of doing business in Sri Lanka was published as a book in Japan.

AFRICA

Market entry groundwork

Japan market study and textile sector archive prepared for an Africa-facing initiative. Introductions in progress through a partner with government-level access.

Engagements, continued

Domestic Business Development - Japan

Alongside our cross-border work, a substantial part of our engagements involves helping companies expand their sales channels **within Japan**.

This matters for overseas clients: it means we hold live, working relationships inside the Japanese market - not only an international network.

AI & Automation - Implemented In-House

We design and run automated workflows in our own operations, in production - not as a demonstration. This includes n8n-based workflow automation and AI-assisted research and document production used in our own day-to-day work.

Currently Ongoing Listed separately from completed work.

Nigeria	Early-stage discussions through a local partner
---------	---

Coverage & Capabilities

Japan	Nationwide. We operate in Tokyo, Nagoya, Osaka and across the country
Team	Members and partners working with us from Brazil, Africa, the Middle East and across Europe
International	Exclusive Japan mandate for a Nordic wave energy technology principal; delivered work spanning Taiwan, Spain, Brazil, Sri Lanka and Africa; partner in the United Kingdom
Languages	Japanese and English, including live interpretation during negotiations
Public sector	Overseas Business Support Representative, Tottori Prefecture

Working Alongside Public-Sector Support

Japan has strong public-sector support for inbound companies. JETRO, through its Invest Japan Business Support Center, provides incorporation, tax and labour advice, PR support, business matching and office search - and many of the companies we work with have used these services to good effect.

Our role sits alongside that, and covers different ground:

	Public-sector programmes	Kohomadha
Nature	Public institutions	A private company
Getting started	Structured programmes and procedures	Low barrier to entry - we can move immediately
Where we focus	Establishing your presence in Japan	Winning your first customers here
Continuity	Within programme timeframes	Continuous, project-based accompaniment

In practice the two work well together: use the public programmes to land, and us to sell.

Fees

Our support is designed per engagement, so we propose the fee structure after understanding your requirements. We can work on a **success-fee basis, a monthly retainer, or a combination of the two.**

Please ask us for a quotation - we will put a proposal together once we understand the scope.

Next Step

We would welcome an hour of your time to hear about your objectives in the Japanese market. On that basis, we will come back to you with a concrete proposal - **which companies to target, and how to approach them.**
